Triware Network Systems Partners With Agility Recovery Solutions Offering Disaster Recovery and Business Continuity Services to Clients

Partnership Creates New Triware IT Service & Support Package Combining Premier IT Network Service & Support With Disaster Recovery Coverage

SANTA CLARA, Calif.--(BUSINESS WIRE)--Triware Network Systems, a leading Information Technology network service and support provider, today announced its partnership with Agility Recovery Solutions, of Charlotte, North Carolina, allowing it to offer Triware clients a new IT Service & Support package that combines the company's premier IT network service and support services with Agility's disaster recovery and business continuity services. The partnership, the first of its kind in Northern California, will allow Triware to offer its clients a cost effective on-site mobile recovery including mobile office space, generators, printers, computers, servers, satellite phone and internet connections in the event of business interruption or disaster.

"We so firmly believe in the value of Agility's recovery services that we are also an Agility customer," said Benson Yeung, senior partner for Triware Network Systems, L.L.C. "So not only will this partnership allow us to offer our clients this valuable service at a low cost but Triware is covered in the event of business interruption giving our clients added confidence that we will still be able to support our own clients in any disaster. Agility has a 100 percent success rate. It responded to 17 recoveries following Sept. 11, 2001, and nearly 40 declarations in the wake of the 2005 hurricane season, which included Hurricane Katrina."

"We believe that any size company should have the security that comes with knowing its business can be up and running within a day or two," stated Andy Boyd, Regional Director for Agility Recovery Solutions. "Historically, business continuity was available only to Fortune 1000 companies. Our service has revolutionized the disaster recovery and business continuity industries giving all sizes of businesses access to affordable turn-key disaster recovery and business continuity services. Agility is the only business of its kind to offer this to the small and medium-sized enterprise. We are glad to be able to partner with Triware – Benson & his group clearly understand the value of such services. We are delighted to have Triware partnering with us in Northern California."

Agility provides mobile office recovery in the event of a business interruption or disaster. If an Agility member is ever temporarily displaced because of fire, storm, flood or any other disaster, company officials will call on Agility to provide an on-site mobile recovery, which includes mobile office space, generators, printers, computers, servers, satellite phone and Internet connections, desks, chairs, fax machines and more. Agility's members are operational within 48 hours of declaring an interruption. Also, as part of the solution, Agility's members have access to the company's \$35 million in technology resources to resolve server failures, power outages or any other service interruption.

Agility Recovery Solutions helps businesses restore their operations and recover their people after a business interruption like fires, floods, power outages and more. The company's turn-key, packaged recovery solutions are available to businesses across North America. Visit www.AgilityRecovery.com for more information.
