Acer's Planning on Having the First Chrome Netbook

By Maureen O'Gara

litl_phil wrote: While it's nice that Google and Acer share the vision of cloud-based computing, it's also worth noting that we at litl already have a webbook on the market (available at litl.com) that runs our own cloud-based OS. Unlike Chrome, litIOS is focused on creating a new and better web experience for the home, so we don't have the usual browser interface, we have our own innovative UI. In conjunction with ease mode (litl's inverted-V position) and our growing cohort of litl channels (special apps t...

SYS-CON.TV: The Missing Link in SOA Projects. Guest Gartner Analyst Roy Schulte

Triware Network Systems (TNS), a leading Information Technology network service and support provider, today announced the completion of its modernization and complete re-architecture of Crystal Springs Upland School's (CSUS) IT network infrastructure. TNS worked with CSUS's staff to relocate and modernize the school's aging equipment by designing along with Cisco Systems a network that would meet and exceed the school's IT needs for the next 3 to 5 years. The company additionally is providing on-going service and support, on-site IT outsourcing and strategic IT assistance to detect any problems with the network, server hardware, operating systems, server applications and network environment before they even occur.

"One of our first major tasks was to relocate and modernize CSUS's data center and equipment. A more equipment friendly environment was identified, new cooling installed and we equipped everything on the newly designed network with uninterrupted power supplies," said Benson Yeung, senior partner for Triware Network Systems, L.L.C. "We believe the new re-architected network infrastructure we have installed positions the school nicely for future IT expansion services."

"TNS had the experience we needed to ensure that our newly refurbished network infrastructure is not only technically equipped with the most advanced features but totally secure," said Dr. John Venuti, director of technology for CSUS. "The TNS staff and engineers are very professional and we are confident with Triware Network's 24/7 monitoring service (Service & Support Operation Center or SSOC) that our system will continue to perform without any issues."

UNISYS

Crystal Springs Upland School is an independent, coeducational, college preparatory day school for grades 6-12 with a student body of 350. Founded in 1952, the school is located on a beautiful 10-acre suburban campus on the San Francisco peninsula in Hillsborough, California. CSUS endeavors to equip students with a feeling of joy in lifelong learning by encouraging individual leadership, cooperative interaction, intellectual risk-taking, and a respect for one's self and for the view of others. For more information, please visit www.csus.org.

Headquartered in Santa Clara, CA, Triware Network Systems, L.L.C. is a leading computer network related service & support provider covering the San Francisco Bay Area. TNS has been highly successful since founded in March 1991, with 100% of its business originating from referrals. For more information contact Triware Network Systems, L.L.C. at 408-330-8900 or visit their website at www.tns.com.

Google Chrome OS Brings New Era in Cloud Computing

By Hovhannes Avoyan

More good news for cloud computing! Google last week released its once mysterious Chrome Operating System to open source. Chrome OS, available in 2010 – is a web-based operating system that promises to boot up super-fast on a netbook – way faster than the time it takes to start y...

Microsoft Cloud Patent Application Not What It Seems

By Maureen O'Gara

InformationWeek stumbled on a Microsoft patent application dating back to 2006 deceptively titled "Migrating Data to New Cloud," which makes it sound like a way out of vendor lock-in, one of the chief drawbacks to cloud computing. Well, it's not according to Vordel CTO Mark O'Neil...

Ensuring Secure Self-Service Through Virtualization

By Eric Chiu

Remember the days when banking had to be done in the branch? Regardless of whether you were making a deposit, withdrawal or just checking your balance, you had to drive to the local branch during business hours to work through a bank teller. Long-distance travel became even more ...

No Shirt, No Shoes, No HTTP Service

By Lori MacVittie

But on the web, access to services is implicit in the fact that the business is offering the service. If the HTTP service is accessible, it's implicitly allowing connections and providing service without any standard criteria for access. This results in access by more than just c...
